

I do not wish for the gov't or any other agency to take away my rightsto have new, weather, or commentarys, or any other type of news, or music, channels,

I pay for the xm benefits, and do not want them tampered with by any agency or Gov't.

I feel that is my right since I pay for the service. I am an over the road driver, and having the weather, in major cities at my finger tips, is a huge benefit to me, that I didn't have before xm, I had to hope I could figure it out, the weather and new also, if there were a national crisis, I would not even know about it, if it were not for the news on xm, because local channels when you are in and out of reception, do not tell you anything, and someplaces, there is no reception for am stations at all.

Thank you, Kelley D. Ratzel
